

1. Introduction

The Geomorphology and Physical Resources group of the Badia Research and Development Programme undertook fieldwork in the programme area during a visit made by British members of the Technical Committee during March and April 1993. The contributing British Earth Scientists were as follows.

Dr Robert J. Allison, Department of Geography, University of Durham, Durham, DH1 3LE.

Dr David L. Higgitt, Department of Geography, Lancaster University, Lancaster, LA1 4YB.

Emma J. Longley, Travers Morgan Ltd, Mead House, Cantelupe Road, East Grinstead, Sussex, RH19 3DG.

Dr Jeff Warburton, Department of Geography, University of Leicester, Leicester, LE1 7RH.

A total of 67 person-days were spent in the field by the British counterparts, during which a number of activities were undertaken in accordance with the work schedule previously discussed by the Technical Committee and outlined in the Geomorphology and Physical Resources, November 1992 document.

The timetable of activities was as follows.
