

1. Introduction

The Geomorphology and Physical Resources group of the Badia Research and Development Programme undertook fieldwork in the programme area during a visit made by British members of the Technical Committee during March and April 1993 (Figure 1). The contributing British earth scientists were as follows.

Dr Robert J. Allison, Department of Geography, University of Durham, Durham, DH1 3LE.

Dr David L. Higgitt, Department of Geography, Lancaster University, Lancaster, LA1 4YB.

Emma J. Longley, Travers Morgan Ltd, Mead House, East Grinstead, Sussex, RH19 3DG.

Dr Jeff Warburton, Department of Geography, University of Leicester, Leicester, LE1 7RH.

A total of 67 person-days were spent in the field by the British counterparts, during which a number of activities were undertaken in accordance with the work schedule previously discussed by the Technical Committee and outlined in the *Geomorphology and Physical Resources (November 1992)* document. The timetable of activities was as follows.

- | | |
|----------|--|
| 18-03-93 | Transfer to Safawi and preliminary recce. |
| 19-03-93 | Land Systems Mapping: ground northeast of Safawi, Geology and Natural Resources assessment. |
| 20-03-93 | Land Systems Mapping: ground northeast of Safawi, Geology and Natural Resources assessment. |
| 21-03-93 | Land Systems Mapping: eastern margin of Programme area, Geology and Natural Resources assessment. |
| 22-03-93 | Land Systems Mapping: ground in north of Programme area, Geology and Natural Resources assessment. |
| 23-03-93 | Land Systems Mapping: southern pipeline road transect. |
| 24-03-93 | Land Systems Mapping: terrain east of the Programme area. |
| 25-03-93 | Land Systems Mapping: ground northwest of Safawi. |
| 26-03-93 | Section logging and sampling in quarry east of Safawi. |
| 27-03-93 | Land Systems Mapping: far northeast corner of Programme area. |
