

## *Abstract*

### *Estimation of Graduates' Number for Educational Planning of Manpower in Badia Region in Jordan*

*Dr. Heyam Njeeb Shraideh*

*Associate Professor*

The purpose of this study is to participate of Badia Manpower in building capacity of Badia Region.

The population of the study consisted of 255 graduates. Records of graduates' applicants and appointees by the civil – servant department between 1992 – 1996 were studied and analyzed.

Findings of the study contained the estimation of graduates number for the period 1997 – 2001, by using statistics of man power due to education level, rates as indicators and Geometric equation as well as simple regression.

Findings indicate that the number of graduates' students from higher education increase proportionally, but at the same time the higher number of graduates students who hold Diploma level, don't participate in Badia Region.

In Conclusion the researcher makes many recommendations and suggestions in the area of policies and planning.
